## FAQs

Q: ARE THERE ANY HOLES DRILLED IN MY SHAFT?

A: NO.

Q: WILL THE SHAFT WEIGHT CHANGE?

A: YES. The weight will increase by just 16 grams. 12 of the grams are within the grip boundary.

Q: WILL THE SWING FEEL DIFFERENT?

A: NO. Your club will swing just as it did prior to augmentation. (Good or Bad)

Q: DOES IT WORK ON DIFFERENT SHAFT FLEXES?

A: YES.

Q: CAN IT WORK ON ADJUSTABLE TIP SETTINGS?

A: YES.

Q: HAS THIS TECHNOLOGY BEEN PROVEN?

A: YES. There have been 2 and ½ years of extensive trial testing by PGA members and amateur golfers utilizing Golf Trackman units.

**Note:** A Golf Trackman unit is a sophisticated Doppler radar and camera system that tracks a golf ball and club in real-time, providing highly accurate data on every shot, used by pros and amateurs for practice, coaching, and entertainment to improve performance through detailed metrics like ball speed, launch angle, spin rate, and carry distance.

Q: DOES THE AUGMENTATION EFFECT:

- BALL SPIN?

A: NO.

- SWING SPEED?

A: NO.

- CLUB SPEED?

A: NO.

- LOFT?

A: NO.

- BALL SPEED?

A: YES.

- CARRY?

A: YES.

- TOTAL YARDS?

A: YES
